Julius Valentiners Vej 30
2000 Frederiksberg
Denmark

HI,

Thank you for considering my application.

I am a Swedish Industrial Designer with a passion for furniture - and interior products. My focus when designing is user centered and functional and my aesthetics is often leaning towards modernism and minimalism, but with a playful approach to communicating the function.

Through the many client projects and studio projects I have done, I have gained a comprehensive understanding of the Design Process and a broad insight in manufacturing techniques and limitations. I feel confident in the process, from first napkin sketch to manufacturing ready prototypes.

On my free time I like climbing (bouldering) and running. And to relax I usually read a book or watch a movie.

Looking forward to meeting and hearing more about the position.

Warm Regards,

[Gustav Carlberg]
